Production Lead

The Production Lead position will prepare production plans based on customer orders, manage production employees, enable the respective line to produce customer orders in a timely manner, and ensure the products shipped meet or exceed customer requirements and quality requirements.

Production Lead must guarantee that manufacturing remains a smooth and efficient process by monitoring employees and organizing the workflow:

- Coordinate with Production associates to prioritize and schedule work orders to meet deadlines.
- Ensure Production Associates complete daily assigned tasks to meet production volume and schedule
- Guide Associates in their assigned duties when needed.
- Organize production space
- Check, verify and fill customer orders
- Ensure that the manufactured product meets customer specifications.
- Maintain documentation of production related activities for reference purposes.
- Identify and resolve problems concerning equipment and materials.

JOB OPPORTUNITIES

- Address any customer concerns promptly and professionally.
- Identify and report unsafe practices to Plant Manager immediately.
- Ensure that work environment is maintained clean, safe and organized.
- Stay up-to-date with production processes and client divisions.
- Make sure orders are processed, packaged and shipped accurately
- Track and report internal and external quality metrics
- Analyze root causes of production issues and develop corrective actions.
- Make sure incoming and outgoing shipments are examined for accuracy
- Abide by all company safety and hygiene regulations
- Contribute ideas on ways to improve or optimize production procedures
- Assure that production space is kept clean and organized daily

Desired Background:

Minimum 4 years manufacturing production experience
Experience with automated production lines is required
Experience at an ISO 9001 certified company is required
